

Poxypriime Epoxy Primer

Poxypriime is a rust-inhibitive epoxy primer/sealer for ferrous and non-ferrous metals. It is a two-component epoxy primer that has excellent corrosion resistance and adhesion to properly prepared metals. It has great flow and leveling making it a great sealer with excellent gloss holdout. It is available in White, Black, and Grey that can be intermixed to achieve any shade of grey for increased color coverage.

- ▼ Excellent corrosion resistance
- ▼ Excellent adhesion to properly prepared bare metals
- ▼ Can be used as Primer or Sealer
- ▼ Great flow and leveling
- ▼ Easy 1:1 Mix ratio
- ▼ Three colors can be intermixed to achieve any grey shade
- ▼ Can be top coated in 30-60 minutes @ 70° F
- ▼ Up to 7 day recoat window without sanding
