

C100 Hyper Cut Compound P200 Hyper Finishing Polish

AutoKote Systems' Hyper Cut Compound and Hyper Finishing Polish are engineered for exceptional performance on both single-stage and clear coat finishes, whether fresh or fully cured. This two-step system delivers fast, efficient paint correction by removing P1500 grit and finer sanding scratches, then refining the surface to a deep, high-gloss finish.

Both the Cutting Compound and Finishing Polish are completely filler-free, ensuring true defect removal rather than temporarily masking imperfections. Their advanced low-dust formulations provide an extended buffing cycle for greater working time, excellent control, and effortless wipe-off, making cleanup quick and easy while delivering professional-quality results.

Features & Benefits

- ▼ **C100 Hyper Cut Compound** removes P1500 grit and finer scratches, swirls, and holograms
- ▼ **P200 Hyper Finishing Polish** removes light imperfections, wool swirls, and holograms
